PROFILE

A passionate, dedicated interior designer with advanced proficiency in industry-standard software and hand drawing. Deeply committed to environmental conservation and a strong advocate for sustainability, integrating eco-conscious practices into every project. I pride myself on being a perfectionist with meticulous attention to detail and a particular passion for yacht design - deriving from the love of summers by the sea. The incredible art of creating an interior that unlocks the ultimate sense of freedom, space that can be transported anywhere in the world, is something quite magical.

EDUCATION
